

BLINK MATCH MEMORY

Official Game Manual & Player Guide

Welcome to **Blink Match Memory**, a fast-paced, adrenaline-pumping twist on the classic memory-matching game! It is not just about memorizing positions anymore—you must race against a ticking clock and survive sudden environmental disruptions that will completely shuffle your board.

Do you have the focus and speed to conquer the storm?

I. GAME OBJECTIVES

The core objective of Blink Match Memory is simple yet challenging:

1. **Find and match all card pairs** hidden on the grid before the countdown timer hits zero.
2. **Adapt swiftly** to sudden weather-based disruptions that scramble the board.
3. **Achieve the highest possible score** by making accurate matches quickly and efficiently.

II. THE CORE GAMEPLAY LOOP

1. **Selection:** At the start of a turn, you select and flip any two face-down cards to reveal their hidden symbols.
2. **Matching Validation:**
 - **It's a Match!** If the symbols match, the cards stay face-up, you earn points, and a success sound effect plays.
 - **It's a Mismatch!** If they don't match, the game pauses for a split second so you can memorize them, and then they automatically flip back face-down.
3. **The Final Outcome:** The game continues until you either successfully match all card pairs (**You Win!**) or the countdown timer hits zero (**You Lose.**).

III. EXCLUSIVE GAME FEATURES & OBSTACLES

1. Time Constrain System

You are constantly under time pressure. A dedicated countdown timer runs independently throughout your gameplay session. Every second you spend hesitating brings you closer to a loss!

2. The Dynamic Weather System (The Storm Disruption)

This is the ultimate test of your short-term memory. The game environment undergoes real-time atmospheric shifts:

- **Sunny Weather:** This is your safety phase. The gameplay proceeds normally, allowing you to build your memory map of where cards are located.
- **Stormy Weather:** When the weather shifts to a storm, you will receive a sudden visual warning (background color change) and a storm sound effect. **Watch out! The remaining face-down cards on the grid will instantly shuffle themselves into completely new positions.** You must abandon your old memory map and quickly adapt to the new layout.

IV. GAME CONTROLS & USER INTERFACE

Blink Match Memory features intuitive, simple controls designed for quick reflexes.

- **Mouse Controls (Desktop):**
 - **Left Click:** Click on any face-down card to flip and reveal it.
 - **Menu Interaction:** Left-click on buttons to navigate the game screens (Start, Restart, Help, and Exit).

Navigating the Game Windows:

- **Start Menu:** Where you initialize your session and enter the game.
- **Help Screen:** Gives you a quick breakdown of rules and expectations before you play.
- **Gameplay Panel:** The main action zone displaying your score, the current countdown timer, the active weather condition, and the grid of cards.
- **Game Over Screen:** Displays your final score, lets you see if you beat the high score, and offers an instant **Restart** or **Exit** option.

V. STRATEGIC TIPS FOR PLAYERS

- **Speed vs. Accuracy:** Try to make rapid matches during the Sunny Phase. The more matches you secure early on, the fewer cards there are left to be scrambled when the storm hits!
- **Don't Panic During a Storm:** When the background changes and the storm sound plays, take a brief breath. Don't blindly click; let the shuffle finish, then methodically start mapping out the new positions.
